Canyon Construction Will Detour Traffic

14 Oct 1984

Motorists who usually take University Avenue from 800 N. in Orem to Center Street in Orem will have to make a detour beginning Monday morning, announced Larry Buss, project engineer for the Utah Department of Transportation.

"We will begin erecting beams for the structure crossing 189 at

the mouth of Provo Canyon," said Buss.

Motorists will have to avoid that particular stretch of University Avenue from 7:30 a.m. to 6 p.m. Monday through Thursday. Flagmen will be at the site on a 24-hour basis to assist with traffic flow, said Buss.

"We hope to have the beams in

place within two days, but it may take until Thursday," he said. The beams are approximately 62-feet long, weighing 65-tons a piece, said Buss.

Motorists should plan another 15-20 minutes when taking the detour route. That route is as follows:

For north bound traffic on U.S.

189 go West on Orem's Center Street to 800 East, then take 800 North into the canyon.

For south bound traffic, reverse the procedure.

"If you can avoid the canyon, it will be best," said Buss. "Caution through the area will be required."
